- Slowly return to start position and repeat.
- Perform 3 sets of 10 Repetitions, once every other day.

use Elastic.

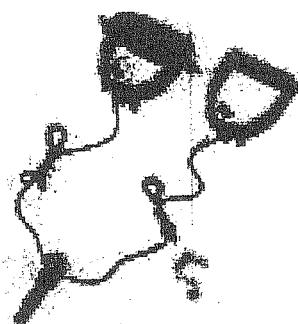

- Relax all muscles in the affected shoulder while holding on to the pulley handle.
- With unaffected arm, gently pull the pulley downward until the point of resistance or discomfort is felt in the affected shoulder; hold this position for 10 seconds, repeat 5-10 times.
- Perform this exercise 3-5 times daily, increasing the elevation of affected shoulder as tolerated.

Shoulder forward flexion/abduction exercise:

- Make sure that you are in good posture to greatly improve the results of your exercises.
- Align your body so that your ears, shoulders and hips fall in a straight line.
- Relax your shoulders so they rest down away from your ears, with your shoulder blades pulled back to naturally lift the chest.

Key factors to remember:

- With the strap in the desired position, close the door and tug on the strap to securely hold it in place.
- Place strap over the top of the door ensuring the anchor is completely through the door gap.
- Be sure the door is closed and secured before starting the exercise.
- Select a door in your home where there is little to no traffic.
